PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience, specialising in web development with Vue.js and Node.js. Proven track record in the dynamic digital payments domain gained through dedicated work for a prominent industry player.

WORK EXPERIENCE

SOFTWARE ENGINEER | centrapay

Nov 2020 - Present

Developed a suite of payment APIs that enables seamless transactions for 1000s of customers using digital assets.

- Integral part in architecting a digital token framework, catering to over 50,000 users and contributing to a substantial \$4000+ in recurring monthly revenue for the business.
- Innovated team workflow by introducing asynchronous standups, reducing meeting time by 22% and enhancing overall team efficiency.
- Facilitated the development and onboarding of 4 interns/junior engineers through mentoring and pair-programming practices.
- Enhanced front-end developer experience by integrating Vue Testing Library to front-end projects.
- Overhauled logging practices across the Engineering team, improving system monitoring and debugging efficiency.

PROJECTS

TABS | [Showcase](#)/[GitHub](#)

University project built with React Native that seamlessly transfers physical handwritten notes into digital files on the user's Microsoft OneDrive, and tasks in their Microsoft ToDo.

- Led the project by implementing and facilitating scrum practices, conducting client meetings, and ensuring effective communication within the team.
- Facilitated development of the app through commits, pair programming, and PR reviews.
- Awarded an "excellence award" for the project, highlighting our client's satisfaction.
